🌐 AliMohammadDev 🌐 Ali Mohammad 🔗 Portfolio 📍 Aleppo, Syria

Profile

Software Engineer with **4+ years** of experience in web development, mainly focused on backend systems. Worked on 10+ projects including admin dashboards, e-commerce platforms, and SaaS applications in industries like real estate and online services.

- Skilled in backend development using **Laravel and Node.js**.
- Strong knowledge of REST APIs, user authentication, and third-party API integration.
- Experience with system design and deploying applications using **Docker**.
- Familiar with frontend tools like React and TypeScript.
- Focused on writing clean, maintainable code and following best practices.
- Always learning new technologies and improving development skills.

Work Experience

Nouh Agency 🔗

11/2025

Responsibilities:

Aleppo, Syria (On-site)

- Developed backend systems using Laravel.
- Built e-commerce and **POS** solutions.
- Worked on **inventory**, **warehouses**, and user **permissions**.
- Developed **booking** and **subscription** systems.

Voom 🔗

03/2024

Responsibilities:

Egypt (Remote)

- Built REST APIs using Node.js and Express.
- Worked on **VR real estate** platforms.
- Developed admin dashboards and **SaaS** systems.
- Collaborated with frontend team using React and TypeScript.

Projects

Elite Racket

- Subscription & Court Booking System
- elite-racket 🔗
- Developed a sports booking platform for padel and tennis courts.
- Managed court reservations, memberships, and training programs.
- Built admin dashboard for schedules, users, and payments.

- Improved booking and club management experience for players and admins.

almanzel-alhadith

A complete e-commerce website built with Laravel, using various tools and integrations to improve user experience and functionality.

almanzel-alhadith 

- Product and category management.
- Product variants and specifications management.
- Order and shipping management.
- Import and suppliers management.
- Mini warehouse management.
- Cashier and Point of Sale (**POS**) system.
- User roles and permissions management.
- Google login integration.
- Online payment integration (Sham Cash, Syriatel Cash, MTN Cash).
- Real-time notifications using Laravel Reverb.
- Progressive Web App (**PWA**) for the admin dashboard.

Real Estate VR

Interactive web application that allows users to view real estate with virtual reality (VR) technology.

Noll Compound 

Assal Mall 

It allows the user to navigate within the properties in a three-dimensional form, including the ability to view the details of each property, filtering the results based on location or price.

Using: **React TypeScript Tailwindcss**

Real Estate Admin Dashboard API

Development of a RESTful API dedicated to an internal control panel (Admin Dashboard) for managing real estate, clients, and reservations in the real estate management system. The system allows internal users to add, edit, delete properties, and follow the statistics associated with them securely and effectively. The system supports multi-tenant (**Multi-tenancy**), which allows the presence of several companies or customers using the same platform with complete data isolation between them.

Using: **Nodejs Express TypeScript MongoDB**

Education

Bachelor's degree in Informatics Engineering

09/2019 – 11/2024

University of Aleppo

Aleppo, Syria

Skills

Technical Skills

Backend Development

- Laravel (experience with Spatie packages, Telescope, Filament, Sanctum, Passport, etc.)

- Node.js, Express.js

Frontend Development

- Languages & Frameworks: TypeScript, React.js, Next.js
- Styling: Tailwind CSS, Bootstrap, DaisyUI

Databases

- Relational: MySQL, SQLite, SQL Server
- NoSQL: MongoDB

Infrastructure & DevOps

- Operating Systems: Windows Server, Ubuntu Server
- Network & Server Management: SSH
- Containerization: Docker

System Design & Architecture

- REST APIs, Authentication & Authorization, Scalable Architectures

Soft Skills

- Effective Communication, Leadership, Problem Solving, Collaboration, Teamwork
